POX	Superi Tech	/ISORY PATENT EXAL INOLOGY CENTER 16	MINER 500

Continuation of 2. NOTE: new claims 63-65 have not previously been submitted for examination, which would require further consideration and/or search for the different issues raised. For example, a 112, 2nd pp, rejection would be necessitated for improper antecedent basis for claims 64 & 64, as well as for a "heterologous polypeptide" being "operably linked" in claim 63. Amended claim 40 recites "comprising a heterologous polynucleotide" that would necessiate further consideration, as it relates to lack of written description under 112, 1st pp.

Continuation of 3. Applicant's reply has overcome the following rejection(s): if later entered, the provisional enablement rejection under 112, 1st pp (pp# 16), the 112, 2nd pp, rejection, and the 102(b) rejection over Adams should be obviated.

Continuation of 5. does NOT place the application in condition for allowance because: still no "specific" utility for the isolated Nap 1/2 polynucleotide of SEQ ID NO:4 has been described within the specification, for the reasons extensively made of record. In other words, Applicants' arguments are not on point, for the reasons made of record as it relates to a general developmental observation due to a deleted gene. Applicants' other arguments have already been addressed in previous Office actions, or are directed to claim amendments not entered; thereby, being moot.

ROBERT C. HAYES, PH.D. PATENT EXAMINER
